First Quarter Ended March 31, 2002

(Unaudited)

ACCOUNTING POLICIES

The management of Sharpe Resources Corporation (the "Corporation") have prepared these consolidated financial statements in accordance with Canadian generally accepted accounting principles. These statements should be read in conjunction with the audited financial statements for the year ended December 31, 2001. These statements follow the same accounting policies and methods as the most recent annual audited financial statements.

STOCK BASED COMPENSATION

Effective January 1, 2002, the Company adopted the recommendations of the CICA Handbook Section 3870, Stock based compensation and other stock based payments. This section requires that direct awards of stock and liabilities based on the price of common stock be measured at fair value at each reporting date, with the change in fair value reported in the statements of income and encourages, but does not require, the use of the fair value method for all other types of stock-based compensation plans. None of the Company's plans qualify as direct awards of stock or as plans that create liabilities based on the price of the Company's stock, and as a result, the implementation of the section has no impact on the financial statements. The Company has chosen not to use the fair value method to account for stock-based employee compensation plans, but to disclose pro-forma information for options granted after January 31, 2002. The Company records no compensation expense when options are issued to employees. Any consideration paid by employees on the exercise of the options is credited to capital stock.

The disclosure in these interim financial statements may not conform in all respects to Canadian generally accepted accounting principles for annual financial statements.

In the opinion of management, all adjustments considered necessary for fair presentation have been included in these financial statements. Operating results for the three months ended March 31, 2002 is not indicative of the results that may be expected for the full year ending December 31, 2002.

STOCK OPTIONS

At March 31, 2002, the Corporation had the following stock options outstanding:

NUMBER OF OPTIONS	EXERCISE PRICE Canadian (\$)	EXPIRY DATE
1,206,000	0.15	August 6, 2002
219,000	0.15	May 4, 2005
105,000	. 0.15	August 14, 2005
1,530,000		

Notes to Consolidated Financial Statements (Prepared by Management)

(Expressed in United States Dollars)

First Quarter Ended March 31, 2002

(Unaudited)

WARRANTS

At March 31, 2002, the Corporation had the following warrants outstanding:

NUMBER OF WARRANTS	EXERCISE PRICE \$	EXPIRY DATE
500,000	1.00	May 12, 2004
2,300,000	0.25	June 5, 2002
2,800,000		

SEGMENTED INFORMATION

The Corporation has one reportable business segment, the exploration for and production of petroleum and natural gas properties in the United States. All of the Corporation's petroleum and natural gas revenue is from customers based in the United States.

Substantially all of the Corporation's assets are located in the United States except for small balances held in Canadian banks. The Corporation's operations in Canada consist of general and administrative expenses necessary to the maintaining of the Corporation's public company status.

5. INCOME TAXES

Estimated taxable income for the period ended is nil. Based on the level of historical taxable income, it cannot be reasonably estimated at this time if its more likely than not the Corporation will realize the benefits from future income tax assets or the amounts owing from future income tax liabilities.

Consequently, the future recovery of loss arising from differences in tax values and accounting values have been reduced by an equivalent estimated taxable temporary difference valuation allowance.

The estimated taxable temporary difference valuation allowance will be adjusted in the period that it is determined that it is more likely than not that some portion or all of the future tax assets or future tax liabilities will be realized.

For further information on the Corporation's actual losses for tax purposes, refer to the December 31, 2001 audited financial statements. The benefit of these losses and the estimated loss for the period ended have not been recognized in these financial statements.

Notes to Consolidated Financial Statements (Prepared by Management)

(Expressed in United States Dollars)

First Quarter Ended March 31, 2002

(Unaudited)

6. BASIC AND FULLY DILUTED INCOME PER SHARE

The income per share is computed by dividing the income for the period by the weighted average number of common shares outstanding during the period. Fully diluted income per share reflects the maximum possible dilution from the potential exercise of outstanding stock options and warrants. For both periods presented, the conversion of warrants and exercise of stock options was not included in the calculation because the calculation was either anti-dilutive or the market price of the Corporation's shares was less than the exercise and conversion price of the stock options and warrants.

STOCK OPTION COMPENSATION ADJUSTMENT

The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions, including the expected stock price volatility. Because changes in the subjective input assumptions can materially affect the fair value estimate, in the opinion of management, the existing models do not necessarily provide a reliable single measure of the fair value of employee stock options. As a result, pro forma earnings and earnings per share have been presented.

For purposes of pro forma disclosures, the following assumptions were used under the Black-Scholes option pricing model: dividend yield of 0%; expected volatility of 750%; risk-free interest rate of 3.75% and an expected average life of 2.9 years.

Net income for the three months ended March 31, 2002 Unrecorded stock option compensation adjustment Pro forma net income for the three months ended March 31, 2002	\$ 14,373 33,100 (18,727)
Basic and fully diluted income per share - Pro-forma	\$ (0.001)

8. GAIN ON SETTLEMENT OF DEBT

Pursuant to the Chapter 11 Plan, agreed unsecured vendor loan claims were paid a 10% cash payment. The remaining 90% of the claims were settled by the issue of preferred stock certificates of Sharpe Energy, bearing a quarterly dividend of 4% per annum. The certificates are fully redeemable in 5 years. At the discretion of the Company, the certificates can be redeemed, all or in part at a discount, based upon the time of redemption. The Company intends to redeem the certificates at a 40% discount within the next fiscal year. Given this intent, the amount outstanding has been classified as debt and the dividend payments are reflected as interest expense to reflect this classification.

As of March 31, 2002, the Company has settled debt with the given discount and incurred a gain of \$138,413.

Supplement to Consolidated Financial Statements (Prepared by Management)

(Expressed in Canadian Dollars)

First Quarter Ended March 31, 2002

Management Discussion & Analysis

March 31, 2002

Description of Business

Sharpe Resources Corporation (the "Company") is a Houston, Texas based, Canadian natural resource company engaged in oil and gas exploration and production in the US. The oil and gas production assets are in a wholly owned U.S. subsidiary, Sharpe Energy Company. Sharpe corporate offices are located at 909 Fannin St., Suite 1450, Houston, Texas, 77010.

Discussion of Operations and Financial Condition

These remarks should be read in conjunction with the December 31, 2001 audited financial statements and the March 31, 2002 unaudited quarterly financial statements.

Sharpe has spent almost 7 years in the US oil and gas business with mixed results. The near-term future of the Company's activities in this sector is not encouraging for several reasons. The high commodity prices for oil and gas products in the US has made it difficult for the Company to grow through acquisition of quality US oil and gas assets. The high cost of good quality properties in this market is disproportionate to what the lending institutions are able to lend for such assets requiring a much larger equity investment to secure good assets. This situation is not beneficial to a company that is attempting to replace properties that were sold in early 2001 at the peak of the natural gas market.

As a result of the conditions that exist in the oil and gas sector for the Company the decision has been made by the management to evaluate opportunities for the Company outside of the oil and gas industry. The Company is studying several options with regard to future activities within and outside of the natural resources business where management believes better opportunities exist to create value for the corporation and increase shareholder value.

Shares issued

No shares were issued during the period.

Management Discussion & Analysis

March 31, 2002

Liquidity and Solvency

The Company has working capital of \$258,009 compared to \$474,316 for the prior year. The Company is now cash flow positive due to the sale of the Matagorda gas properties in the previous year. The Company believes in cash preservation and will not spend funds unless absolutely required or mandated by any future transaction.

At March 31, 2002, the Company had cash of \$343,042.

Net income for the quarter ended March 31, 2002 was \$14,373 compared to income of \$546,320 the year before.

Basic and diluted income per share is \$0.0004 for the quater ended March 31, 2002.

As of March 31, 2002, accounts payable and accrued liabilities of \$86,316 were outstanding.

Management Synopsis

Sharpe Resources Corporation is a Texas based oil and gas exploration and production company. All of the oil and gas assets are located in Texas and are held in a wholly owned US subsidiary, Sharpe Energy Company.

The Company's shares are listed on the Canadian Ventures Exchange CDNX:SHO. The common shares are traded in the United States on the National Quotation Bureau's "Pink Sheets" SHGPF. At March 31, 2002, Sharpe had 33,184,803 shares outstanding.
